

AIR NEW ZEALAND CARGO TERMINAL STAGE 6 & 7

This project involved working within a number of areas within the Air New Zealand Cargo Terminal located at Auckland Airport. We built a new MAF Bio-Security facility, dangerous goods store, chillers to Cargo 1 & 4, dispatch and mail office, equipment pit, installed barriers, bollards and high speed roller doors to various areas.

All of these works were carried out in a fully operational environment which required a high level of planning and co-ordination with the Client. The works were staged in order to minimise disruption and security clearance was required for all staff and subcontractors.

There was just under \$400,000 of variations on the project as scope was added and new areas of works included in the contract. These works were attended to promptly and efficiently and were a result of our successful track record onsite.

In Brief

Project:
Air New Zealand Cargo
Terminal Stage 6 & 7

Client:
Air New Zealand

Location:
Auckland Airport

Year Started:
2007

Duration:
5 Months
