

ASSEMBLY OF GOD TAKAPUNA

The \$1.8m Negotiated Design and Build project included a large auditorium for 1500 people, large stage, offices, kitchen, other facilities and associated amenities.

The structural support system consists of glue laminated portals and timber purlins. Extensive building services are included to create a comfortable and safe environment, including air-conditioning, sprinklers, lighting and audio visual installations.

Canam had to overcome the challenges of acoustic design and sound reverberation creating an environment where a large amount of people can comfortably and clearly follow a service or a show on a purpose built stage.

Specific acoustic and sound absorbing material were used to deal with the large volume and space within the main auditorium.

The result for the design and build project by Canam is a SETMA merit award and a very satisfied client.

In Brief

Project:
Assembly of God Takapuna

Client:
Assembly of God

Location:
Takapuna, Auckland

Year Started:
1985

Duration:
12 Months

Project Value:
\$1.8m

Contract Type:
Negotiated Design & Build
