

BIBLE COLLEGE CHILDCARE CENTRE

Canam has been involved in the master planning of the Bible College's future expansion. The Childcare Centre is just one project that Canam has recently completed for the College.

Canam's role was to manage both the design and build phases of the project whilst working closely with the architect and college delegates to achieve an end result that all parties involved are very proud of.

This process involved consultation with many user groups and designers to create an innovative and functional childcare centre that was completed within a conservative budget. The centre offers the college and the wider community a first-class childcare facility providing specialist care areas for various age groups of children and infants.

The facility includes quiet-rooms, indoor and outdoor play areas, staff amenities, a large kitchen, safe storage areas, toilets and extensive landscaping. The structure is a combination of structural steel, timber framing and reinforced concrete. The exterior is clad with both coloursteel, zincalume and glass to create a feast of colours and shapes.

In Brief

Project:
Bible College Childcare
Centre

Client:
Bible College of NZ Inc

Location:
Henderson, Auckland

Year Started:
2001

Duration:
4 Months

Project Value:
\$0.4m
