

# CANAM JOINERY FACTORY

Canam constructed a custom designed facility for its joinery shop and yard in Henderson.

The development includes a state of the art joinery plant with computer equipment and production controlled CNC machines.

The factory includes a centralised extraction system for dust control to meet all health and safety requirements. The associated yard facility provides extensive covered and open yard areas for storage of all Canam plant and equipment, together with a secure storage and maintenance facility to support construction operations.
