

COUNTRYWIDE BANK

Canam was the sole contractor to Countrywide Bank for almost 10 years completing all the banks brand and office fitouts throughout New Zealand.

This included fitouts to new branches, refurbishments and alterations to existing branches and fitouts and refurbishments to their Head Office and regional offices, call centres, computer centre and specialist banking facilities.

Canam's role included planning and coordination of the overall fitout programmes, management, execution and delivery of the completed works. The joinery was fabricated and installed by Canam Joinery throughout the country.

Most refurbishments were completed while the branches continued to trade and we developed work systems with the bank to enable this to occur in a seamless fashion, avoiding any negative impact on their operations.
