

MASSEY PARK AQUATIC CENTRE

The Papakura City Council selected Canam to construct the new Massey Park Aquatic Centre in a competition among five contractors. The basis was time, quality, schedule of rates, P&G costs and margin. A Guaranteed Maximum Price incorporating profit sharing was subsequently agreed.

The project consists of a 25m eight lane competition pool, toddler pool, leisure pool, hydroslide, steam rooms, sauna, changing facilities, poolside recreation areas, swimwear shop and a café.

The leisure pool incorporated a "lazy river" with curved reinforced concrete walls, a wave machine and swirl pools were also provided.

A 'jungle theme' was created for the leisure pool, utilising palm trees, wild vegetation, rocks, artwork, casual finishings, and parasols.

N A Muro the director of Community, Recreation and Parks for the District Council of Papakura says:"Canam's performance was above redemption with the project being completed on time and within budget."
