

PORSCHE SHOWROOM

An existing showroom and workshop was completely refurbished as a new state of the art facility for the Porsche Car Showroom.

Refurbishment work included extension to the existing structure, complete exterior recladding and complete refitting of the interior. Canam was involved from the outset of the design of the project, and provided input on design options and cost alternatives to ensure that the completed project could achieve the client's expectations both from aesthetics, functionality and cost perspectives.

The project was completed ahead of time and within budget.
